

## A-1 Planter Mix

### PRODUCT DESCRIPTION:

*A-1 Planter Mix* is a blend of washed sand, organic fines, A-1 Lifelike™ 3/8” Compost, peat moss and aqua gro (a wetting agent to enhance the mixtures ability to absorb water). This soil is relatively lightweight due to its high organic content and extremely low clay content. Although it has a superior percolation rate, its water and nutrient holding ability greatly reduces leaching of valuable plant nutrients and minerals.

### PRODUCT USES:

- *Rooftop or parking structure containers and planters*
- *Backfill when planting trees or shrubs (well draining)*
- *Palms, citrus, succulents media*
- *Topdressing*

### PRODUCT APPLICATION:

*A-1 Planter Mix* may be applied directly as a backfill for planters. It may also be applied to existing native soil by rotor-tilling a 2” layer to 2” to 4” of existing soil. It is important to rotor-till with existing soil to create a transition zone. A final layer of 4” to 6” may then be applied to the rotor-tilled surface. Periodically apply mineral nitrogen at 5 pounds per 1,000 square feet.

### PRODUCT ANALYSIS:

PH Range .....	6.0 - 7.5
ECe (Salinity).....	< 6.0
SAR.....	< 3.0
Nitrate Nitrogen .....	1.0 — 15.0
Boron.....	< 1.0
Organic % by Volume .....	65%
Organic % by Dry Weight.....	8% - 10%
Dry bulk density (lbs/ft3).....	66.07%
Saturated bulk density (lbs/ft3).....	98.28%
