

## Brown Dyed Wood Chips

### PRODUCT DESCRIPTION:

*Brown Dyed Wood Chips* is comprised of cedar and plain wood. The brown dye contains iron oxide, which has been used for centuries for colorant. The dye is non toxic and similar to food coloring. Brown Dyed Wood Chips is recommended for use of mulch in a medium to large planting area. Brown Dyed Wood Chips have a nice dark finish and when spread around greenery it catches your attention immediately. Brown Dyed Wood Chips have been a fast growing choice for gardeners who prefers a nice dark rich look for mulching.

### PRODUCT USES:

- Ground Cover / Mulch

### PRODUCT APPLICATION:

- Recommended application rate for ground cover/mulch is a minimum of 2 to 4 inches deep. One cubic yard covers 324 sqft 1” deep.
- Pre application of a balanced fertilizer or *A-1 Lifelike 3/8” Compost* in planted areas is recommended to prevent nitrogen draw from the soil as the bark decomposes.
- *Once the dye is set on the colored wood chips it is “permanently adhered” to the wood chips, however it is still recommended to lay down a tarp first when unloading onto a driveway to prevent the Brown Dyed Wood Chips from “possibly” leaving a light stain.*

### PRODUCT ANALYSIS:

Composition ..... Cedar & Plain Wood  
 Particle Size ..... 1” - 2”
